

BillSecret? App Strategy Guide

The BillSecret App is like anything else, you get out of it what you put into it. Many people will settle for just a few extra dollars per month and that is ok. Buy The BillSecret? App can do a whole lot more than that. You can actually use the BillSecret? App to completely reorganize their money and what they have to do for their money every month. With the proper strategy you can not only supplement your income and pay off a couple of bills per month, You can take this to the point where a day job may not be necessary when you use the systematic approach and implement strategy.

1. OK, let's get into it. Remember one of the most powerful moves you can do is what I like to call "The first strike". The earlier you are in the process, the better you will be. So, what do I mean by that. OK. You need to think the way that other people think. When anyone learns about something new, they trust the person that tells them about the new thing much more than after they have become familiar with what is being introduced. When you are the first person to bring someone in, they trust your direction and follow your direction a lot more than if they already know about the BillSecret? App. So when you tell them about the app and ask them to put your affiliate link in there limited number of spots, they tend to oblige you if out of nothing more than gratitude and your appearance as an authority on the app. So, BE FIRST. Even when you are talking to your family....BE FIRST. Remember, you have a lot of family members and they can ask for help also. You want to be on the cutting edge.
2. Build your shopping army into the thousands. When you contact family and friends actually request that they tell their friends to download the app and to put your affiliate link into their app as well. You essentially gain people that not only helps you when they shop but also to help you get new shoppers. Use every avenue to spread the word.
3. Target people who are more likely to do it. You may know a series of doctors. These people aren't who you are looking for. Nine chances out of ten, they don't shop at these places and if they do, money is not a problem for them. The person you are looking for is people who have bills, debts, and a need to make ends meet. For example, single moms, administrative assistants, technicians, etc. You want to target people who make \$50,000 dollars and less. That is the sweet spot.
4. Use your social media Facebook, Instagram, and Twitter when you find out that someone online meets your criteria target the heck out of them. Remember, you aren't asking for a favor, you are providing a solution. It's best to contact them one by one rather than just posting a message if you want to build your "shopping army". When you post a link, they may still download the app but neglect to add you as one they support.
5. Use the influence within your office and community, odds are, if you're interested, they are as well.
6. Help older people understand and use the app. Many people overlook the older generation. I'm not talking about 90 year olds. I'm talking about some 50 year olds. Some people know just enough to use Facebook, text and make calls. Help them understand so that they can help you.
7. Go to Facebook groups about making money or single moms, pizza drivers, Walmart drivers, Fedex drivers, doordash drivers etc. then go to the members tab. There you will find people of the socioeconomic position who you can direct message and get people on the app with your affiliate link.
8. Don't forget Teenagers. College and school age children can be a rich source of supporters. They typically are always looking to make money, so play the long game with them. They will

undoubtedly get friends and family involved. When they make money, they will shop. That is when you will make money.

9. Canvas your neighborhood. I know that many people live online these days but you can't neglect face-to-face. If you have a neighbor that you know and wave to every morning, tell them about the app and ask for them to download it and put your affiliate link into it. They will be grateful and if they live in the same area as you do, their income and desire to make money should be around the same.
10. Visit forums and websites that talk about money, bills, debts etc. You can find people who need help there.

Explanation Button – You can get money from family and friends that would normally frown at the request. You can also give money to your loved ones without coming out of your own pocket. When you get an affiliate link from Amazon.com, Walmart.com, Target.com, you simply have your friends and family download this app and have them plug in your affiliate link. When they buy something on Amazon, Walmart or Target, it doesn't cost them any more money but you get paid every time. Now, think if you build a shopping army of 50 to 500 or more members, friends, family, followers, and subscribers to use the app. When they plug in your affiliate links, they just keep feeding you money as they shop. If someone has referred you, put their affiliate link in your "Support" area and just shop as usual through this app. With every purchase you make you will help your friends and family members by funneling money to them. This is money that would normally go to corporations. Why not give it to those you care about? Tell Aunt May, Uncle Benny and everybody you can get in contact with to download this app! Build your army of shoppers and let them flood you with free money to pay your bills!
